Objective

Final-year Information Technology student at UTH with hands-on experience in backend development through internships, part-time roles, and real-world projects. Experienced in building RESTful APIs, working with databases, and developing scalable backend systems. Seeking a Backend Developer opportunity to apply strong software engineering fundamentals, contribute to real-world products, and grow within a professional engineering team.

Education

University of Transport Ho Chi Minh City (UTH)

Bachelor of Science in Information Technology — GPA: 3.25/4.0

Ho Chi Minh City

2022 – 2026

- **Graduation Thesis:** Legal QA RAG System – Hybrid RAG for Vietnamese Law Q&A (*Practicum: 8.50/10*)

Work Experience

CloudGO | PHP Developer Intern

06/2026 – 07/2026

- Trained on enterprise CRM workflows and a proprietary PHP-based CRM framework
- Configured a PHP 7.1/MySQL development environment and worked with GitLab-based development workflows
- Practiced CRM customization using custom Actions/Views, AJAX processing, Record Models, database operations, and UI components

Cong Ty Co Phan GoPlay Tech | Backend Developer (Remote Part-time)

01/2026 – Present

- Developing and maintaining ERP/CRM modules covering warehouse management, employee workflows, customer tracking, and sales pipeline
- Designing and documenting RESTful APIs consumed by the frontend team; participating in sprint planning and code reviews
- Collaborating remotely in a startup environment with fast iteration cycles and cross-functional team coordination

Enterprise Semester Internship | C# Backend Intern (Hoc Ky Doanh Nghiep)

03/2025 – 05/2025

- Built microservices-based features using C# .NET following enterprise-level clean architecture and SOLID principles
- Implemented inter-service communication via REST APIs; studied Domain-Driven Design (DDD) and CQRS patterns in a real codebase
- Participated in code reviews, daily standups, and Agile sprint workflow within the company team

Internship (Remote) | Backend Java Intern

09/2023 – 11/2023

- Developed and documented RESTful APIs using **Java/Spring Boot** for a student management module
- Designed MySQL database schemas, wrote service-layer unit tests, and fixed bugs reported during QA cycles
- Practiced Git branching workflow (feature branches, pull requests, merge reviews) in a team environment

Projects

Legal QA RAG System | Spring Boot · FastAPI · Vue.js · PostgreSQL · Qdrant · Docker

2026 — Graduation Thesis

- Full-stack **hybrid RAG** system for Vietnamese legal Q&A with microservices architecture
- Built Spring Boot API Gateway: JWT auth, request routing, and orchestration across Python/FastAPI workers
- Implemented hybrid search: **dense vector search (Qdrant)** + BM25 Okapi sparse retrieval merged via Reciprocal Rank Fusion (RRF)
- Designed hierarchical legal document parser mapping Vietnamese law text by Article and Clause
- Optimized latency with parallel BM25 warmups and PostgreSQL connection pooling; containerized with Docker Compose
- 🌐 github.com/nguyentrungcongduong/Legal_QA 📄 [Thesis Report](#) 🖥️ [Slides](#)

Job Application Tracker Pro | Spring Boot · Spring Security · PostgreSQL · React · Docker · AWS EC2

2025

- Kanban job application manager deployed on **AWS EC2** with Docker containerization
- **JWT authentication** + email verification using Spring Security 6 and bcrypt password hashing
- Automated interview reminders via Gmail SMTP with Spring Scheduler background jobs
- Analytics dashboard with conversion funnel and probability prediction using PostgreSQL window functions
- [🌐 job-tracker-web-theta.vercel.app](#) [🔗 GitHub](#)

PlanBookAI | Spring Boot · React · MySQL · Docker · Gemini AI — Team of 4

2026

- AI-powered SaaS for K-12 teachers; focusing on backend architecture and API design
- **4-role RBAC** (Admin/Manager/Staff/Teacher) with scoped permission enforcement via Spring Security
- VNPay payment gateway: HMAC-SHA512 signature, Return URL + IPN server-to-server handling
- Gemini AI pipeline for lesson plan generation, exam creation, and OCR answer sheet grading
- [🔗 github.com/CongduongNT/JAVA](#)

COD Management System | Spring Boot · PostgreSQL · React · TypeScript · Ant Design

2024

- 3-role COD platform: Shop owners track revenue, Shippers scan QR codes, Admins detect fraud
- Automatic reconciliation between shops and delivery personnel; overdue alerts and Excel export
- [🌐 Live Demo](#) [🔗 GitHub](#)

Multiple-Choice Exam Website | Spring Boot · Thymeleaf · jQuery · Firebase

2024

- Online testing platform: real-time scoring, ranking leaderboard, admin CRUD
- Firebase Authentication for login; Spring MVC + Thymeleaf for server-side rendering
- [🔗 github.com/nguyentruongcongduong/web_trac_nghiem](#)

Technical Skills

Java Backend	Java, Spring Boot 3, Spring Security 6, Spring Data JPA, RESTful API, JWT, OAuth 2.0, Maven
Other Backend	Python/FastAPI, PHP/Laravel, Golang/Gin, Node.js
Frontend	React, TypeScript, Vue.js, Next.js, Tailwind CSS
Database	MySQL, PostgreSQL, Redis, Firebase, Qdrant (vector DB)
DevOps & Tools	Docker, Docker Compose, AWS EC2, Git, Postman, Jira
Languages	Vietnamese (Native) English – B2 CEFR (SunUni Academy)

Certifications

Google Cloud Computing Foundations Certificate <i>Google Cloud</i>	01/2026
Google Cloud Skill Badges ×4 <i>Google Cloud — Prepare Data for ML APIs · Secure Network · Load Balancing · App Dev Environment</i>	01/2026
DevOps for Freshers <i>DevOpsEdu.vn</i>	03/2026
English Communication Course – B2 CEFR <i>SunUni Academy</i>	07/2025
Certificate of Basic IT Application <i>University of Transport Ho Chi Minh City (UTH)</i>	05/2024
